TSA MESEPELE TRANSLOG (PTY)Ltd

Hosted RTA Fleet Maintenance Software

¹Software Overview

RTA Fleet Management Software was built to help fleet managers improve productivity and fleet maintenance while minimizing downtime.

RTA's Fleet Management Software enables fleet managers to take full advantage of their fleets. Feature-rich modules, customizable software, and annual updates make RTA your ideal fleet management software vendor.

Everyone can agree that technology is great, except when it isn't. Like when it's time to hassle with downloading new system software to servers with multiple computers or deal with anxiety over whether your IT people will be able to handle glitches or security breaches. Tsa Mesepele Translog is here to take the pain out of software system operation with our acclaimed, reliable, and fast Hosting Services.

You don't need to install anything. Tsa Mesepele has installed RTA Software on their server in Gaborone. All you will need to do is log in.

Software is accessible from any internet-connected computer running Windows. It's web-based, so your organisation will have access to the software from anywhere.

Your company is not responsible for upkeep of the service provided. You save money and eliminate the hassle that comes with support, maintenance and upgrades.

Tsa Mesepele becomes your IT Department, offering unparalleled, streamlined support. Hosting Services pay for themselves by eliminating the need for providing your own system maintenance, backup, security and support.

Tsa Mesepele Hosting provides the best possible protection of the software investment. RTA Software is State-of-The-Art Fleet Management and the best way to maximise its benefits is to let the team that support it manage it for you.

Hosting software solution for you fleet is to identify, analyse and eliminate problem areas that often result in higher-than-necessary transport operating costs. You implement Best Fleet Management practices. It's a tool for Professional Transport Managers. Hosting requires no investment in purchasing software or hardware. Hosting is available on yearly subscription. Pay only for standard annual support and upgrade fee of the system. Tsa Mesepele provides additional benefits in providing professional support and guidance to your Transport Manager. System training and implementation is provided for free. Clients only pays for transport and accommodation for far distance areas.

TRY SYSTEM BEFORE YOU BUY - cost cutting measure IT Strategy

Contact Tsa mesepele for full features of the Hosted application or visit RTA website at www.rtafleet.com for detailed system features.

The benefits of a web-based application managed by an ASP : (Application Service Provider)

- The risk of a bad technology investment is drastically reduced
- You are generally guaranteed better application available, better data security, more frequent data backups, disaster recovery and basic centralised technical support.
- If you are small business, you will be able to rent software which might otherwise be impractical or unaffordable.
- You will have more time, money and energy to focus on business issues rather than IT concerns

You will benefit from Tsa Mesepele's Professional Transport expert support assistance in implementing Best Fleet Management Practices.
